

MODI AKSHAR VISHAL

Gujarat, India | [+91-9408006867](tel:+91-9408006867) | classaxar@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Computer Science student with experience in Python, JavaScript, and SQL, focused on building data-driven and scalable applications. Hands-on exposure to cloud fundamentals and deployment concepts, with projects involving real-world data analysis and backend system design. Interested in frontend and data-focused roles.

EDUCATION

B.Tech in Computer Science & Engineering (Lateral Entry)

Institute of Computer Technology, Ganpat University | 2025 – 2028

Diploma in Information Technology

B.S. Patel Polytechnic, Ganpat University | CGPA: 7.87 / 10

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript

Frontend: HTML, CSS, JavaScript

Backend & Databases: SQL, Database Design

Data Analysis: Pandas, NumPy, Matplotlib

Core CS: Data Structures, OOP

Cloud & Tools: AWS (S3, EC2 - fundamentals), Git, GitHub, Linux

DATA ANALYSIS PROJECT

Forest Cover & CO₂ Emissions Analysis | Python, Pandas, NumPy, Matplotlib

- Processed and analyzed 20+ years of World Bank environmental data using Python
- Cleaned and transformed datasets using Pandas and NumPy for analysis
- Applied statistical techniques such as correlation analysis and moving averages
- Identified correlation trends between forest cover decline and rising CO₂ levels using 20+ years of data
- Derived insights from large datasets to understand environmental impact patterns
- GitHub: <https://github.com/classaxar/india-forest-co2-analysis>

PROJECTS

1. SpendWise – Personal Finance Tracker | Python, SQL

- Built a backend-driven personal finance tracking system to manage income and expenses
- Designed database schema to store transactions, categories, and user data
- Implemented core features such as expense logging, categorization, and balance tracking
- Developed data handling logic for efficient storage and retrieval of financial records
- Structured the project for scalability and future feature integration
- GitHub: <https://github.com/classaxar/spendwise-personal>

2. Nova AI Assistant | Python

- Developed a basic AI assistant using language model APIs for text-based interaction
- Implemented prompt handling and response generation logic
- Designed simple interface for user interaction
- Explored integration of AI capabilities into applications
- GitHub: <https://github.com/classaxar/Nova-AI-Assistant>

3. Car Rental Management System | Java, SQL

- Designed and implemented a backend system for car rental operations using Java and SQL
- Built database schema to manage customers, bookings, and vehicle availability
- Implemented core functionalities such as booking management and record tracking
- Applied object-oriented design principles for modular and maintainable code

EXPERIENCE

Technical Support — Gujarat Forest Department (Vibrant Gujarat Event)

- Managed and structured digital records with focus on efficient data organization and accessibility
- Improved data organization and accessibility for operational workflows
- Coordinated with cross-functional teams to ensure smooth execution

CERTIFICATIONS & VIRTUAL EXPERIENCE

- **McKinsey Forward Program** — McKinsey & Company (2026) *(Certificate pending)*
- [AWS Academy Graduate – Cloud Foundations — Amazon Web Services](#)
- [Software Engineering Virtual Experience — JPMorgan Chase & Co. \(Forage\)](#)
- [Python for Data Science — IBM](#)
- [Data Science Essentials — Cisco](#)
- [Android Programming Training — Ganpat University](#)
- [Research Writing Excellence Workshop — Ganpat University](#)
